

# When we support promising research, everyone benefits

Research at the Center for Proteomics at Case Western Reserve University is making it easier to identify people at risk for diseases such as diabetes and colon cancer. Developing less invasive, less costly screenings means more people get tested and treated.

The Cleveland Foundation is supporting CWRU with \$3 million in grants, because we believe in the power of its research to improve health in Greater Cleveland.

If medical breakthroughs are important to you, why not join us?

When you give to your favorite causes *through* the Cleveland Foundation, you can tap into our experts in investing and grantmaking so that your gift lasts – and keeps on giving – forever.

Dr. Mark Chance, director of CWRU's Center for Proteomics, leads a team that studies proteins to better understand and treat many diseases.
